

Dear Colleagues,

As one of the members of the Organizing Committee, I am happy to welcome you to attend the ***International Conference on Environmental Toxicology and Pharmacology (EnviPharm)*** February 21 - 23, 2019 in Paris, France!

The main theme of this year's conference is Probing and Counteracting Toxic Impact. Our aim is to establish a network of environmental epidemiologists, toxicologists, pharmacologists, ecologists, and many other specialists able to address a variety of impactful topics and challenges in pharmacology and environmental toxicology.

We acknowledge that the physical environment has a strong bearing on the health of our people and our planet. Thus, it is imperative that we identify emerging harmful and toxic agents and establish a reliable and robust methodology for quantifying and evaluating their effect on human health. In addition, precision medicine integrates the role of environmental factors in the etiology of a disease within specific genetic backgrounds. To achieve this integration, the various omics and omics technologies can also play a powerful role, so we welcome researchers in the omics to join us, too.

I am confident that this year's conference will facilitate networking, information exchange and collaboration among researchers and global experts in our respective fields. We are looking forward to seeing you and hearing your comments and suggestions in Paris, February 21 - 23, 2019. Your presence and your energy can help ensure the success of ***EnviPharm 2019*** and the advancement of world health.

Best wishes,

Ming-Tsang Wu, MD, ScD

Organizing Committee Member, EnviPharm 2019

Professor, Department of Public Health, Kaohsiung Medical University, Kaohsiung, Taiwan

Director, Research Center for Environmental Medicine, Kaohsiung Medical University, Kaohsiung, Taiwan

Director, Graduate Institute of Clinical Medicine, Kaohsiung Medical University, Kaohsiung, Taiwan

Director of PhD Program in Environmental and Occupational Medicine, Kaohsiung Medical University, Kaohsiung, Taiwan

Attending Physician, Department of Family Medicine, Kaohsiung Medical University Hospital, Kaohsiung Medical University, Kaohsiung, Taiwan
